## Seniors

At Burrard Physiotherapy, we recognize that seniors are remaining active and vital long after retirement. As such, our staff are here to help you achieve and maintain your lifestyle goals. We have therapists who have special training in conditions such as osteoarthritis, arthritis and hand therapy. We are a part of the OASIS Joint Replacement Rehabilitation Team and provide both pre and post operative care for those undergoing hip and knee replacements. Enquire about our healthy heart program, or join a seniors yoga class. If you have suffered an injury or have a chronic condition, our knowledgeable staff will assess you and provide you with the help you need. Our clinic offers large, private, closed-door treatment rooms and long appointments. Both our rooms and reception area easily accommodate wheelchairs, scooters and walkers. From physiotherapy, to specially designed exercise classes to mobility aids, we will ensure all your mobility goals are met.
